

# envisage<sup>®</sup> inkjet cartridges

We supply envisage<sup>®</sup> inkjet cartridges for all the leading brands including Epson, Hewlett Packard (HP) and Lexmark.

## Quality remanufactured cartridges

Every envisage<sup>®</sup> cartridge is fully guaranteed, and using remanufactured cartridges does not invalidate your machine's warranty. envisage<sup>®</sup> cartridges are of equivalent quality to Original Equipment Manufacturer (OEM) cartridges. All of the products in the envisage<sup>®</sup> range are benchmarked to OEM specifications, and all key components are replaced. Every envisage<sup>®</sup> cartridge prints at least the same number of pages as the equivalent OEM product.

## How we produce envisage<sup>®</sup> inkjet cartridges

The process of remanufacturing an envisage<sup>®</sup> inkjet cartridge ensures we produce a quality product. Every cartridge that we use is checked and fully cleaned, and where necessary we replace any components. After filling, the cartridges are weight checked to ensure the ink fill is correct, and equivalent to OEM standards.

## Testing

We test every single cartridge so you get the highest quality, every time. Every cartridge is 100% print tested, with a sample of each batch also being tested on printers outside the production facility. Each cartridge has its own individual bar code for full traceability.

## Sealing

The cartridges are sealed with a transport clip to prevent drying and protect the delicate components of the cartridge during transit.

We offer a free recycling service; call for more details or just add code 962 0408 to your next order to receive a free collection box.

*The full envisage<sup>®</sup> range is featured in our catalogue.*
